DRIA INFRASTRUCTURE SYSTEMS: CONFIGURATION SPECIFICATION MATRIX

UNIFIED ADHESIVES SYSTEM CONDUIT INTERFACE | PREVIEW NODE TRANSCRIPT

Issuing parent authority	DRIA Home Builders (Pty) Ltd (Reg. No. K2014137652)
Distribution status	Evaluation specification grid — secure lockbox protected
Master gateway router	https://driahomebuilders-publisher-systems.github.io/

I. PLATFORM INTEROPERABILITY & SYSTEM RUNTIME DEPENDENCIES

This master document compiles evaluation-grade data field configurations across the unified adhesives material spectrum. These assets operate strictly as an independent Systems Integration Layer Engine to bridge raw procurement fields into functional formatting compatible with Sage Cloud ERP, Procore Admin Ledgers, Autodesk Construction Cloud, and enterprise SAP S/4HANA infrastructure grids.

II. VOLUME 2 — SILO B: DYNAMIC MECHANICAL UTILITY FRAMEWORK (ADHESIVES CORES)

This asset manages specialized material database field mappings across active building infrastructure components.

SILO B RUNTIME INTERACTION FAULT ALERT: Internal mechanical sub-modules and chemical matrices remain static until bound to the main structural framework distribution profiles. Ingestion committed without the corresponding end-leaf authentication tokens will trigger immediate system-wide database validation faults during ingestion staging.

SAGE ERP LEDGER LIVE VIEWPORT: ADHESIVES SYSTEM VAULT

Code	Description	Category	Item Type	Preview Status
[REDACTED]	Adhesives - Crack fillers	Vault_Asset	Vault_Asset	Validated String
[REDACTED]	Adhesives - Glue & welds	Vault_Asset	Vault_Asset	Validated String
[REDACTED]	Adhesives - Silicones	Vault_Asset	Vault_Asset	Validated String
[REDACTED]	Adhesives - Tapes	Vault_Asset	Vault_Asset	Validated String
[REDACTED]	Adhesives - Wood fillers	Vault_Asset	Vault_Asset	Validated String

PROPRIETARY PROTECTION PARAMETER: Complete database primary crosswalk codes and relational text strings right of the Category boundary are omitted within this evaluation excerpt to protect operational asset integrity.

III. QUANTITATIVE SYSTEM MATRIX AUDIT & PROCUREMENT PROTOCOL

Evidence Item	Current Document Treatment
Sage Ledger Category Matches	CONFIRMED / Mapped Natively
Database Density & Alignment Check	Passed System Interoperability Audit

UNBUNDLED STANDALONE PORTFOLIO VALUE	**$225,000.00 USD once-off**
UNBUNDLED SINGLE MIGRATION CATEGORY MAPPING	**$45,000.00 USD per node**

PROCUREMENT PATH

This document is an evaluation and corporate enquiry asset, not a purchase order, executed licence, or binding commitment to deliver. Interested organizations may submit a formal procurement enquiry for follow-up. Any transaction remains subject to scope confirmation, corporate procurement approvals, verified wire clearing, and mutually agreed written terms under a

definitive Master Software License Agreement (MSLA).
