

■ ■ DRIA INFRASTRUCTURE SYSTEMS: STRUCTURAL DISCONNECT DATA MATRIX

CSI MASTERFORMAT INTEGRATION: VOL I (SILO A - SUPERSTRUCTURE & SKIN)

DISTRIBUTION STATUS: EVALUATION SPECIFICATION GRID — PRODUCTION VAULT SECURED

1. SYSTEM RUNTIME DEPENDENCIES

This specification sheet outlines data field configurations for Division 05 (Metals), Division 06 (Woods, Plastics, & Composites), and Division 09 (Finishes - Surface Coatings). This asset is decoupled from underlying foundations to support modular engineering compliance review workflows.

NOTICE: Ingestion of this matrix into Sage Cloud ERP or Procore ledgers requires localized initialization via the foundational Division 03 (Concrete) mapping parameters. Running this file without the root structural crosswalk index will trigger field dependency validation faults.

2. RELATIONAL DATA EXCERPT

Column A (Code)	Column B (Description)	Column C (Category)	Column D (Item Type)	Column E (Text Field 1)
75895	36531-Structural Steel Framing Assemblies	MasterFormat_Division_05	Service	BI-F132.105[CSI]
75899	36534-Heavy Timber Wood Construction	MasterFormat_Division_06	Service	BI-F132.106[CSI]
75905	36538-High-Performance Protective Coatings	MasterFormat_Division_09	Service	BI-F132.109[CSI]
