

■ ■ DRIA INFRASTRUCTURE SYSTEMS: DYNAMIC MECHANICAL DATA MATRIX

CSI MASTERFORMAT INTEGRATION: VOL I (SILO B - FLUID & AIR LOGISTICS)

DISTRIBUTION STATUS: EVALUATION SPECIFICATION GRID — PRODUCTION VAULT SECURED

1. SYSTEM RUNTIME DEPENDENCIES

This architecture sheet outlines structural row parameters for Division 07 (Thermal & Moisture Protection), Division 22 (Plumbing Systems), and Division 23 (HVAC Distribution). Mapped for immediate system-of-systems interoperability audits.

NOTICE: Internal mechanical sub-modules remain static until bound to the main infrastructure power distribution line profiles governed by Division 26 (Electrical). Ledger updates committed without the end-leaf connection keys will register as incomplete database arrays.

2. RELATIONAL DATA EXCERPT

Column A (Code)	Column B (Description)	Column C (Category)	Column D (Item Type)	Column E (Text Field 1)
75912	36540-Thermal Ingress Dampproofing	MasterFormat_Division_07	Service	BI-F132.107[CSI]
75941	36541-Facility Water Piping Infrastructure	MasterFormat_Division_22	Service	BI-F132.122[CSI]
75946	36542-HVAC Piping and Pumps Engine	MasterFormat_Division_23	Service	BI-F132.123[CSI]
